PRESS RELEASE

## **Montu Set to Further Streamline Cannabis Access with the Launch of Online Patient Platform, Circuit™**

MELBOURNE, 31 January 2022 – Just a month after Montu’s record-breaking equity raise and commitment to invest in their technological infrastructure, the company has launched their online patient platform, Circuit™.

Circuit™ is a one-stop-shop where patients can manage their cannabis prescriptions with features such as refill management, consultation management, visibility of Montu’s product offering, and patient education. The portal is fully personalised and set to change the healthcare landscape.

“The Circuit patient portal was a natural evolution for Montu as it aligns to our patient-centric approach,” says Christopher Strauch, Montu Managing Director. “We are bringing together the best in cannabis care with the technological infrastructure to support a seamless patient experience.”

Last year Montu successfully launched Circuit™ as a tool for its nationwide network of Australian doctors to maintain an overview of their prescriptions and create repeat scripts with a click of a button. With the creation of the new patient platform on Circuit™, patients now have access to their own personalised portal giving them more control over their cannabis medication and cannabis care consultations.

Montu’s integrated cannabis ecosystem, is leading the charge in digital health, with Circuit™ adding another dimension to their offering. Patients will soon be able to log on and view their own customised selection of cannabis products based on the Therapeutic Goods Administration (TGA) categorisation.

“We are moving quickly to align to the new TGA regulations where Special Access Scheme approvals are based on active ingredient.” says Strauch. “This fundamental regulatory change will improve patient access to medical cannabis and we are building systems to support this framework shift.”

“This is just the beginning for patients, as we plan to continuously expand the Circuit™ offering. We are listening closely to our patients’ feedback and have several additional features already in our roadmap for the coming months.”, he says.

**About Montu:**

Montu is a leading Australian medical cannabis company. The company has built an integrated cannabis ecosystem, which streamlines the experience for patients end-to-end, and sets new standards in cannabis care. Montu connects Australians to highly qualified doctors, via the alternaleaf™ telehealth platform, and supports them throughout their journey with a dedicated patient care team. Montu is built on four key pillars which integrate to build a seamless patient experience; telehealth patient care, doctor education, product supply and pharmacy dispensing. The team is committed to improving the lives of millions of patients with medical cannabis therapies.
